PLEASE READ BEFORE ORDERING

All gladioli up to 100 bulbs or more sent prepaid at prices listed in this catalogue. Bulbs in lots of 100 or over sent express collect. Small bulbs in any quantity sent postpaid. We absolutely make no substitutions except in collections and reserve the right in collections only to substitute in event our stock of any variety is depleted. We will then substitute bulbs of equal value and as near like those ordered as possible. All bulbs offered subject to prior sale.

100 large bulbs at seven times the dozen rate.

EXTRAS

Except on collections we will add 15 per cent in bulbs your choice on orders from \$2.50 to \$5.00; and 25 per cent on all orders over \$5.00 for orders received before April 1. These extras can be selected from bulbs up to and including catalogue value of 15 cents each.

(Upjohn's Gladiolus Gardens are on Pacific Highway in Salem city limits at 2229 Fairgrounds Road. Visit us when the flowers are in bloom.)

TO OUR CUSTOMERS

In line with many requests we are offering small as well as large bulbs this year. Large bulbs are first size, full blooming bulbs. Small bulbs we offer are ungraded up to one inch in diameter and will be placed in the orders as they come from the trays. Practically all of these bulbs will bloom the first year and all will make fine blooming bulbs the second year. All of our bulbs are sound, high class stock, irrigation grown, with an extra long growing season and are full of vigor and pep.

No single small bulbs will be sold unless so listed. Small bulbs will be sold only in quantities as listed, or in multiples thereof. No order filled for less than \$1.00 for either small or large bulbs.

If you want the finest blooms, buy the large bulbs. If you want good blooms this year, and more bulbs next for less money, buy the small bulbs. We recommend a combination of the two with some bulblets added to enhance your pleasure. Bulblets listed on another page.

PLANTING AND CULTIVATION

Plant large gladiolus bulbs not over four inches deep nor less than four inches apart in sunny situation. Water well and cultivate well. Plant from April 15 on to June 1. When cutting flowers cut when first bud opens and keep in water. All the blooms will open to the tip. Leave at least four leaves when cutting to mature the bulb. Dig in fall, giving 30 days after blooming for bulb to mature. Keep bulbs in dry place away from heat, moisture and frost.

Plant small bulbs not more than three inches deep and not less than four inches apart. Treat like large bulbs. Most of them will bloom and all will make large blooming bulbs for the following year.

Plant bulblets two inches deep, as early as ground is in good friable shape. Keep well watered. Germination will be improved if bulblets are kept in damp sand, in warm place week or two before planting or long enough for root growth to develop. Plant sand

and all. Bulblets of most varieties will give virtually 100 per cent germination by this process. Many bulblets if handled right will make blooms and give large bulbs the first year. They all come true to the parent plant.
